

Sixth Grade Science Year at a Glance

Unit	1: Matter and Water	2: Earth's Structures and Natural Processes	3: Environmental Interactions
Timeline	55 - 65 days	48 - 58 days	39 - 49 days
Summary Statement	<p>A study of the atomic model and the kinetic theory of matter including a study of the distribution and circulation of water through Earth's systems, and human dependency on water.</p> <p>Concepts: Systems, Cause and Effect, Energy</p>	<p>A study of the interrelationships between Earth's structures, natural processes, and human activity.</p> <p>Concepts: Cause and Effect, Patterns, Systems</p>	<p>A Study of the complex interactions between organisms, environment, and the flow and use of energy.</p> <p>Concepts: Patterns, Cause and Effect</p>
